VIEW

Use default columns with the addition of Description, Entered By » Name (rename to Requestor), Resolve Project » Name (rename to Converted Project) and any custom fields, if applicable.

GROUPING

As desired, but some good options are Issue » Queue Topic, Issue » Planned Completion Date (Day), Issue » Status or Project » Name.

FILTERS

Assignment Users » ID → Equal → \$\$USER.ID

Issue » Status Equates With → Not Equal → Complete

OR

Team ID » Equals » \$\$USER.homeTeamID

Issue » Status Equates With → Not Equal → Complete

NOTE: The field Assignment Users looks at all issue assignments, whereas the field Assigned To only looks at the Primary Assignee. Also, to view issues assigned to ALL teams, not just the Home Team, update the wildcard filter for Team ID » Equal » to \$\$USER.teamIDs
